

Press release

EuroBLECH exhibition met with great interest for Schröder Group

Convincing solutions for automated sheet metal working

Wessobrunn-Forst (Germany), 10 November 2022 – "Our booth was literally overrun." That was the impression of Schröder Group employees at the machine manufacturer's booth during EuroBLECH 2022. Many of the visitors came to Schröder with very specific ideas. Thanks to the partners from the Schröder Group's global sales network present at the booth, it was also possible to cope with the many international visitors.

Visitors on the Schröder booth demonstrated a great sense for technical details and were interested, for example, in the optimized rotating clamping beam of the folding machine PowerBend Professional or the automatic tool changer for the folding beam of the EVO Center, which was shown for the first time. The PowerBend Multi, which was on show for the first time, and the MAKU, which has been popular for many years, also attracted the interest of the numerous visitors.

But not only the news attracted attention. For example, the slip bending roll and the swaging machine from Schröder-Fasti also attracted a particularly high level of interest.

The gauge for conical bending was demonstrated on the folding machine MAKU for entry-level motorized sheet metal working. This invention allows the precise production of pluggable profiles, for example for parapet covers, roof edge trims, verge sheets or cladding with a slope.

About Schröder Group

The Schröder Group consists of Hans Schröder Maschinenbau GmbH, which is located in Wessobrunn-Forst, Germany, SCHRÖDER-FASTI Technologie GmbH, located in Wermelskirchen, Germany and the SMU GmbH, located in Leinburg-Weißenbrunn.

Founded in 1949, Hans Schröder Maschinenbau GmbH unifies traditional and modern approaches in machine building: Successfully managed as a quality and customer-oriented, family-owned company, Hans Schröder Maschinenbau is specialized in the development of modern machine concepts for bending and cutting sheet metal.

The successful integration of the Fasti Company in 2006 and its worldwide presence make the Schröder Group one of today's leading providers of machines for bending, cutting, beading, flanging, and circular bending all types of sheet metal. The company's precision machines range from proven solutions for craftsmen to innovative, high-performance machines for automatic industrial production processes. 2021 the Schröder Group was expanded by the tool manufacturer SMU GmbH. Overall, the Schröder Group currently employs more than 300 people at various locations at home and abroad.
