Schröder Group at the SamuMetal show in Italy

SAMUMETAL3–6 February 2016
PAD 4, Stand 10-C

Represented with a versatile folding machine

Wessobrunn-Forst (Germany), 26 January 2016 – The Schröder Group will be present at the SamuMetal show from 3 to 6 February 2016 with its popular folding machine PowerBend Professional. The exhibitor on this traditional fair for sheet metal processing in Pordenone (located midway between Venice and Trieste) will be Merlino Engineering, partner of the Schröder Group (PAD 4 – Stand 10-C).

The PowerBend Professional that will be shown at the SamuMetal show (working length 3,200 mm, sheet thickness 3.0 mm steel sheet) is a suitable folding machine for the industrial thin sheet metal processing, but it is also popular with bigger handicraft businesses. This machine is characterized by its robustness and its high repeat accuracy.

The PowerBend Professional is one of the major highlights at the booth of Merlino Engineering. The Schröder sales partner will be scoring high in customer meetings thanks to numerous equipment options that are available for this machine. Options include Up-and-Down-folding beam, motorized crowning system, rotating clamping beam with a second tool station, operation from the front and an innovative gauge with suction cups.

About Schröder Group

The Schröder Group consists of Hans Schröder Maschinenbau GmbH, located in Wessobrunn, Germany, and SCHRÖDER-FASTI Technologie GmbH, located in Wermelskirchen, Germany. Founded in 1949, Hans Schröder Maschinenbau GmbH combines traditional and modern aspects in mechanical engineering. Successfully managed as a quality and customer-oriented family company, Hans Schröder Maschinenbau specialises in the development of modern machine concepts for folding and cutting sheet metal. Thanks to the 2006 integration of the Fasti Company and its workshops and a global presence, the Schröder Group is now a leading provider of folding, cutting, crimping, beading, and shearing machines of all kinds. The diversity of the range of precision machines ranges from proven solutions for trade to innovative, high-performance machines for automated industrial production. The Schröder Group now employs more than 240 workers at various domestic and international locations.
