Schröder Group at the exhibition MWCS in Shanghai

Increase in productivity for Chinese sheet metal working companies

7–11 November 2017
Booth 2H-A088

Wessobrunn-Forst (Germany), 25 October 2017 – Dongguan TAM Precision Machinery Co. Ltd., the exclusive distribution partner of Schröder Group in China, represents the leading manufacturer of sheet metal working machines at the Metalworking and CNC Machine Tool Show (MWCS). The exhibition takes place from 7 to 11th of November in Shanghai.

On the booth 2H-A088 visitors can have a look at the motorized folding machine PowerBend Professional. The machine bends up to 4 mm thick steel sheets at a working length of 2500 mm. A special feature: Even big sheets can be processed by only one person: Thanks to the Up-and-Down folding beam the sheet does not need to be turned over for counter folds. The highly precise machine is suitable for continuous operation and represents the step from handicraft business to industrial manufacturing. This is supported by the machine software control POS 2000 Professional. The big advantage: The software does not only control the machine, but also guides the operator step-by-step through all necessary operating steps.

About Schröder Group

The Schröder Group consists of Hans Schröder Maschinenbau GmbH, located in Wessobrunn, Germany, and SCHRÖDER-FASTI Technologie GmbH, located in Wermelskirchen, Germany. Founded in 1949, Hans Schröder Maschinenbau GmbH combines traditional and modern aspects in mechanical engineering. Successfully managed as a quality and customer-oriented family company, Hans Schröder Maschinenbau specialises in the development of modern machine concepts for folding and cutting sheet metal. Thanks to the 2006 integration of the Fasti Company and its workshops and a global presence, the Schröder Group is now a leading provider of folding, cutting, crimping, beading, and shearing machines of all kinds. The diversity of the range of precision machines ranges from proven solutions for trade to innovative, high-performance machines for automated industrial production. The Schröder Group now employs more than 240 workers at various domestic and international locations.
