

Press release

Schröder Group at the Elmia trade fair in Sweden

19–22 May 2026
Booth No. A03:25

A popular machine from Bavaria

Wessobrunn-Forst (Germany), 7 May 2026 – The Schröder Group will be exhibiting at Elmia (Booth No. A03:25) in Jönköping from May 19 to 22, 2026. The manufacturer of sheet metal working machines will be presenting its product portfolio for the first time with its own booth at the Swedish trade fair. The company will be showcasing the PowerBend Professional motorized folding machine.

The PowerBend Professional on display at Elmia folds up to 3.0 mm thick steel sheets over a working length of 3240 mm. The machine stands out thanks to its up-and-down folding beam and its large clamping beam stroke of 540 mm, which allows for a maximum box height of 250 mm. Thanks to this feature, sheets do not need to be turned for counter-bends. This improves ergonomics and speeds up the process. Another feature is the rotating clamping beam, which can automatically switch to a second set of tools during operation.

The PowerBend Professional is available with an optional innovative hemming function. This allows for the high-volume production of hollow folds with maximum machine performance, ensuring exceptional precision and high repeatability.

With its industrial-grade features, the PowerBend Professional is highly popular not only in industrial settings but also in small workshops.

About Schröder Group

The Schröder Group consists of Hans Schröder Maschinenbau GmbH, which is located in Wessobrunn-Forst, Germany, SCHRÖDER-FASTI Technologie GmbH, located in Wermelskirchen, Germany and the SMU GmbH, located in Leinburg-Weißbrunn.

Founded in 1949, Hans Schröder Maschinenbau GmbH unifies traditional and modern approaches in machine building: Successfully managed as a quality and customer-oriented, family-owned company, Hans Schröder Maschinenbau is specialized in the development of modern machine concepts for bending and cutting sheet metal.

The successful integration of the Fasti Company in 2006 and its worldwide presence make the Schröder Group one of today's leading providers of machines for bending, cutting, beading, flanging, and circular bending all types of sheet metal. The company's precision machines range from proven solutions for craftsmen to innovative, high-performance machines for automatic industrial production processes. 2021 the Schröder Group was expanded by the tool manufacturer SMU GmbH. Overall, the Schröder Group currently employs more than 300 people at various locations at home and abroad.
